Just finished Bimini Deep. Amazed at the detail and description of the places and the nautical equipment used by Matt and Christy. Gotta say, ...have a warm spot in my heart for Christy...haha, quite the woman. Well done.

Just loved the whole idea of the Taino people and where they lived.

Great book, can't put it down once you start on it.

Ed Arntzen

It's seriously a manuscript for a movie..... I finished reading Bimini Deep. OUTSTANDING!! You not only have a hit movie on your hands, I believe you have a hit book series on your hands (if you wanted to pursue that). Whatever formula you used, it is powerfully engaging. Excellent detail on the dive gear and oxygen mixtures. Even an armchair adventurer can follow along with that.....I actually felt claustrophobic when the team had to take off their backpacks to get through a two foot high tunnel....deep down in that cave!!...Wheww....no cave diving for me. That's dangerous stuff even for the experts. Great detail about the Coast Guard, ships, officer rank and officials. All around GREAT character development. GREAT ENDING!! And now I want to read their next adventure damn it!!....lol. I'll read it again and google all the things I want to learn more about. Bimini Deep ranks up there at the top with any Clive Cussler Novel I've ever read. I should know. I've read every Clive Cussler novel he ever wrote, up until he started writing with co-authors a few years ago. Thank you for writing that book Captain.
